

Rules Regarding Use of the DrJ Certification Mark

QP 11 | Issued 03/12/2015 | Revised 11/03/2025 | Revision 8

Per ISO/IEC 17065, DrJ Engineering, LLC (DrJ) shall exercise the control as specified by the certification scheme over ownership, use and display of licenses, certificates, marks of conformity and any other mechanisms for indicating a product is certified. This policy applies to companies whose product has been certified by a DrJ TER (Technical Evaluation Report), or Listing Report.

Description

The DrJ certification mark consists of a black slanted parallelogram with the term “Dr” (uppercase D, lowercase r) in it adjacent to a lower slanted parallelogram with the uppercase letter “J” in it. This lower slanted parallelogram may be green, gray, or white with a black border. The non-graphical portion of the certification mark consists of “TER XXXX-XX” or “TER XXXX-XXX”, where the X’s represent a specific six- or seven-digit Technical Evaluation Report (TER) number. In the case of a DrJ Listing Report, the mark consists of “XXXX-XX” or “XXXX-XXX”, where the X’s represent a specific six- or seven-digit Listing Report number.

Allowable Format and Layout

The DrJ certification mark may only be used by a company whose product has been certified by the TER or Listing Report. Upon granting product certification, DrJ will supply the company with the certification mark. A product evaluated by a DrJ TER or Listing shall be labelled on the product or packaging with the appropriate TER or Listing number for said product, such as “DrJ TER XXXX-XX(X)” or “TER XXXX-XX(X)”. A product may also use the DrJ certification mark on the product or packaging, but the use of the graphical portion of the certification mark is not required (see examples below).

TER XXXX-XX(X)

(graphical portion of certification mark not used in this example)

A company that also uses the Center for Building Innovation (CBI) to perform Third Party Inspection for its certified product may receive an alternate mark to indicate that service.

TER XXXX-XX(X)

(graphical portion of certification mark not used in this example)

Only the mark/files provided by DrJ may be used on a certified product label. A company may choose to resize the graphical portion of the mark by making it larger or smaller, but the mark must be legible and remain in proportion to the original design. Where it is necessary to clarify the scope of coverage of a certification mark, i.e., to avoid ambiguity or to indicate a limitation of the certification scope, DrJ shall ensure that its marks on the certified products are appropriately qualified.

Client Responsibilities Regarding the DrJ Certification Mark

Per the terms and conditions included in the TER Application, each client agrees to abide by DrJ's current and future guidelines for use of its certification mark.

- The client complies with any requirements that may be prescribed in the certification scheme relating to the use of marks of conformity, and on information related to the product.
- DrJ maintains control over ownership, use, and display of licenses, certificates, marks of conformity, and any other mechanisms for indicating that a product is certified.
- Incorrect references to the certification scheme or misleading use of licenses, certificates, marks, or any other mechanism for indicating a product is certified found in documentation or other publicity, shall be immediately rectified to the satisfaction of DrJ.
