

Listing and Technical Evaluation Report™

Report No: 2011-01

Issue Date: January 12, 2021

Revision Date: December 17, 2024

Subject to Renewal: October 1, 2025

Use of Huntsman Building Solutions Spray Polyurethane Foam (SPF) in Two-Hour Fire-Rated Wall Assemblies

Trade Secret Report Holder:

Huntsman Building Solutions

Phone: 855-742-7227 Website: huntsmanbuildingsolutions.com Email: kgrzybowski@huntsmanbuilds.com

CSI Designations:

DIVISION: 07 00 00 - THERMAL AND MOISTURE PROTECTION

Section: 07 21 19 - Foamed-in-Place Insulation

1 Innovative Products Evaluated¹

- 1.1 The Huntsman Building Solutions (HBS) products evaluated in this report for use in a two-hour fire-rated non-load bearing Area Separation Wall (ASW) assembly are listed below:
 - 1.1.1 Classic Ultra™
 - 1.1.2 Classic Ultra Select™
 - 1.1.3 Classic Plus™
 - 1.1.4 Icynene Classic 45
 - 1.1.5 Icynene Classic 75
- 1.2 The products listed in **Section 1.1** shall hereinafter be referred to as "HBS Approved ASW Spray Foams" in this report.
- 1.3 The Huntsman Building Solutions products evaluated in this report for use in a two-hour fire-rated load bearing Wall Partition (WP) assembly are listed below:
 - 1.3.1 Sealection® 500
 - 1.3.2 Sealection® NM Open-Cell Spray Foam
 - 1.3.3 Foam-Lok™ 500
 - 1.3.4 Foam-Lok™ 450
 - 1.3.5 OC No-Mix™
 - 1.3.6 Classic Ultra™
 - 1.3.7 Classic Ultra Select™
 - 1.3.8 Icynene Ultra 50

Subject to Renewal: 10/01/25 Page 1 of 15

- 1.3.9 Icynene OC No-Mix
- 1.3.10 Icynene Classic 45
- 1.4 The products listed in **Section 1.3** shall hereinafter be referred to as "*HBS Approved WP Spray Foams*" in this report.

2 Product Description and Materials

2.1 The innovative products evaluated in this report are shown in Figure 1 and Figure 2.

Figure 1. HBS Approved ASW Spray Foams in a Two-Hour Fire-Rated Non-Load Bearing ASW Assembly

Figure 2. HBS Approved WP Spray Foams in a Two-Hour Fire-Rated Load Bearing WP Assembly

- 2.2 HBS Approved ASW Spray Foam are proprietary, open (low density) and closed (medium density) cell Spray Polyurethane Foam (SPF) with a nominal density between 0.5 and 2.4 pcf.
- 2.3 The two components of HBS Approved ASW Spray Foam are:
 - 2.3.1 Component A: MDI/pMDI isocyanate
 - 2.3.2 Component B: proprietary resin
- 2.4 These two components are combined at the point of spray application.
- 2.5 As needed, review material properties for design in **Section 6** and to regulatory evaluation in **Section 8**.

3 Definitions

- 3.1 New Materials² are defined as building materials, equipment, appliances, systems or methods of construction not provided for by prescriptive and/or legislatively adopted regulations, known as alternative materials.³ The design strengths and permissible stresses shall be established by tests⁴ and/or engineering analysis.⁵
- 3.2 <u>Duly authenticated reports</u>⁶ and <u>research reports</u>⁷ are test reports and related engineering evaluations, which are written by an approved agency⁸ and/or an approved source.⁹
 - 3.2.1 These reports contain intellectual property and/or trade secrets, which are protected by the <u>Defend Trade</u> Secrets Act (DTSA). 10
- 3.3 An <u>approved agency</u> is "approved" when it is <u>ANAB ISO/IEC 17065 accredited</u>. DrJ Engineering, LLC (DrJ) is listed in the ANAB directory.
- 3.4 An <u>approved source</u> is "approved" when a professional engineer (i.e., <u>Registered Design Professional</u>) is properly licensed to transact engineering commerce. The regulatory authority governing approved sources is the <u>state legislature</u> via its professional engineering regulations.¹¹
- 3.5 Testing and/or inspections conducted for this <u>duly authenticated report</u> were performed by an <u>ISO/IEC 17025</u> accredited testing laboratory, an <u>ISO/IEC 17020</u> accredited inspection body and/or a licensed <u>Registered</u> Design Professional (RDP).
 - 3.5.1 The Center for Building Innovation (CBI) is ANAB12 ISO/IEC 17025 and ISO/IEC 17020 accredited.
- 3.6 The regulatory authority shall <u>enforce</u>¹³ the specific provisions of each legislatively adopted regulation. If there is a non-conformance, the specific regulatory section and language of the non-conformance shall be provided in <u>writing</u>¹⁴ stating the nonconformance and the path to its cure.
- 3.7 The regulatory authority shall accept <u>duly authenticated reports</u> from an <u>approved agency</u> and/or an <u>approved source</u> with respect to the quality and manner of use of new materials or assemblies as provided for in regulations regarding the use of alternative materials, designs, or methods of construction.¹⁵
- 3.8 ANAB is an International Accreditation Forum (IAF) Multilateral Recognition Arrangement (MLA) signatory where recognition of certificates, validation and verification statements issued by conformity assessment bodies accredited by all other signatories of the IAF MLA with the appropriate scope, shall be approved. 16 Therefore, all ANAB ISO/IEC 17065 duly authenticated reports are approval equivalent. 17
- 3.9 Approval equity is a fundamental commercial and legal principle. 18

4 Applicable Standards for the Listing; Regulations for the Regulatory Evaluation¹⁹

- 4.1 Standards
 - 4.1.1 ASTM E119: Standard Test Methods for Fire Tests of Building Construction and Materials
 - 4.1.2 ASTM E2032: Standard Guide for Extension of Data from Fire Resistance Test Conducted in Accordance with ASTM E119
 - 4.1.3 GA 600 Fire-resistance and Sound Control Design Manual, 22nd Edition
- 4.2 Regulations
 - 4.2.1 IBC 15, 18, 21: International Building Code®
 - 4.2.2 IRC 15, 18, 21: International Residential Code®
 - 4.2.3 IECC 15, 18, 21: International Energy Conservation Code®

5 Listed²⁰

5.1 Equipment, materials, products or services included in a List published by a <u>nationally recognized testing</u> <u>laboratory</u> (i.e., CBI), <u>approved agency</u> (i.e., CBI and DrJ), and/or <u>approved source</u> (i.e., DrJ) or other organization concerned with product evaluation (i.e., DrJ) that maintains periodic inspection (i.e., CBI) of production of listed equipment or materials, and whose listing states either that the equipment or material meets nationally recognized standards or has been tested and found suitable for use in a specified manner.

6 Tabulated Properties Generated from Nationally Recognized Standards

- 6.1 General
 - 6.1.1 HBS Approved ASW Spray Foams are used in the following applications:
 - 6.1.1.1 Two-hour fire-rated non-load bearing ASW assemblies where required in buildings constructed in accordance with the IBC or IRC.
 - 6.1.1.2 Two-hour fire-rated non-load bearing ASW assemblies without a protected wall when the ASW forms the fire barrier between inaccessible attic spaces. Ignition or thermal barriers shall be installed in accordance with the applicable code.
 - 6.1.2 HBS Approved WP Spray Foams are used in the following applications:
 - 6.1.2.1 Two-hour fire-rated load bearing wall partition assemblies where required in buildings constructed in accordance with the IBC or IRC.
- 6.2 Two-Hour Fire-Rated Non-Load Bearing ASW Assemblies
 - 6.2.1 HBS Approved ASW Spray Foams are approved for use in two-hour fire-rated non-load bearing ASW assemblies as described in this document and in accordance with <u>IBC Table 601</u>, <u>IBC Table 705.5</u>²¹ and IRC Section R302.2.
 - 6.2.1.1 HBS Approved ASW Spray Foams shall be applied directly to the inside face of the gypsum board shaft liner, its accompanying H-Studs, and the adjacent framing without the need for an airspace between the shaft liner and the insulation.
 - 6.2.1.1.1 HBS Approved ASW Spray Foams may be applied to one or both sides of the shaft liner wall assembly creating either symmetrical or asymmetrical layouts.
 - 6.2.1.2 Up to 4" of HBS Approved ASW Spray Foams are allowed to be applied as described in **Section 6.2.1** directly to the ASW assemblies listed in **Section 6.2.2**.
 - 6.2.1.3 The thickness of HBS Approved ASW Spray Foams when applied to ASW assemblies in attic spaces per **Section 6.1.1.2** shall be governed by testing of spray foam exposed in attic applications as detailed in Report Number 1406-03.
 - 6.2.2 HBS Approved ASW Spray Foams are approved for use in the following two-hour fire-rated non-load bearing ASW assemblies when applied according to **Section 6.2.1**:
 - 6.2.2.1 UL U336
 - 6.2.2.2 UL U347
 - 6.2.2.3 UL U366
 - 6.2.2.4 <u>UL U373</u>
 - 6.2.2.5 UL U375
 - 6.2.2.6 UL U388
 - 6.2.2.7 GA ASW 0800
 - 6.2.2.8 GA ASW 0810
 - 6.2.2.9 GA ASW 0980

- 6.2.2.10 GA ASW 0985
- 6.2.2.11 GA ASW 0997
- 6.2.2.12 GA ASW 0999
- 6.2.2.13 GA ASW 1004
- 6.3 Two-Hour Fire-Rated Load-Bearing Wall Partition Assemblies
 - 6.3.1 HBS Approved WP Spray Foams are approved for use in two-hour fire-rated load-bearing wall partition assemblies in accordance with <u>IBC Table 601</u>, <u>IBC Table 705.5</u> and <u>IRC Section R302</u>, and are as described below:
 - 6.3.1.1 A double row of minimum 2 x 4 studs aligned front to back, 16" o.c. on separate plates a minimum of 1" apart.
 - 6.3.1.2 Two (2) layers of 5/8" thick Type X Gypsum Wall Board (GWB) conforming to ASTM C1396 applied vertically (parallel to studs) with staggered joints covered with tape and joint compound (face layer only).
 - 6.3.1.2.1 Base layer of GWB fastened to wood studs and bearing plates 8":8" o.c. (edge:field) with 15/8" Type W screws.
 - 6.3.1.2.2 Face layer of GWB fastened to wood studs and bearing plates over base layer 8":8" o.c. (edge:field) with $2^{1}/2$ " Type W screws.
 - 6.3.1.3 Minimum of 3¹/₂" of HBS Approved WP Spray Foam installed in stud cavities of either wall section.
 - 6.3.2 HBS Approved WP Spray Foams are approved for use in the following two-hour fire-rated load bearing assemblies when applied according to **Section 6.3.1**:
 - 6.3.2.1 GA WP 3820
 - 6.3.2.2 ICC ESL 1373, Design No SPFI-1373-01
- 6.4 Where the application falls outside of the performance evaluation, conditions of use and/or installation requirements set forth herein, alternative techniques shall be permitted in accordance with accepted engineering practice and experience. This includes but is not limited to the following areas of engineering: mechanics or materials, structural, building science and fire science.

7 Certified Performance²²

- 7.1 All construction methods shall conform to accepted engineering practices to ensure durable, livable, and safe construction and shall demonstrate acceptable workmanship reflecting journeyman quality of work of the various trades.²³
- 7.2 The strength and rigidity of the component parts and/or the integrated structure shall be determined by engineering analysis or by suitable load tests to simulate the actual loads and conditions of application that occur.²⁴

8 Regulatory Evaluation and Accepted Engineering Practice

- 8.1 HBS Approved ASW Spray Foam comply with the following legislatively adopted regulations and/or accepted engineering practice for the following reasons:
 - 8.1.1 HBS Approved ASW Spray Foam were evaluated in accordance with ASTM E119 for the following applications:
 - 8.1.1.1 Performance of two-hour fire-rated non-load bearing area separation wall (ASW) assemblies listed in **Section 6.2**.
 - 8.1.1.2 Performance in two-hour fire-rated non-load bearing ASW assemblies without a protected wall when the ASW forms the fire barrier between attic spaces (with a thermal or ignition barrier in accordance with the applicable code).
 - 8.1.1.3 Performance in two-hour fire-rated load bearing wall assemblies listed in **Section 6.3**.
- 8.2 Any building code, regulation and/or accepted engineering evaluations (i.e., research reports, <u>duly authenticated reports</u>, etc.) that are conducted for this Listing were performed by DrJ Engineering, LLC (DrJ), an <u>ISO/IEC 17065 accredited certification body</u> and a professional engineering company operated by <u>RDP/approved sources</u>. DrJ is qualified²⁵ to practice product and regulatory compliance services within its scope of accreditation and engineering expertise, respectively.
- 8.3 Engineering evaluations are conducted with DrJ's ANAB <u>accredited ICS code scope</u> of expertise, which are also its areas of professional engineering competence.
- 8.4 Any regulation specific issues not addressed in this section are outside the scope of this report.

9 Installation

- 9.1 Installation shall comply with the approved construction documents, the manufacturer installation instructions, this report and the applicable building code.
- 9.2 In the event of a conflict between the manufacturer installation instructions and this report, the more restrictive shall govern.
- 9.3 General
 - 9.3.1 SPF insulation shall be applied by licensed dealers and installers certified by Huntsman Building Solutions.
 - 9.3.2 A copy of the manufacturer published installation instructions shall be available at all times on the jobsite during installation.
 - 9.3.3 HBS Approved ASW Spray Foam shall be installed in accordance with the manufacturer installation instructions and this report.
 - 9.3.4 In the event of a conflict between the manufacturer installation instructions and this report, the more restrictive shall govern.
 - 9.3.5 HBS Approved ASW Spray Foam shall be applied to the framing using two-component spray equipment and shall be applied using a 1:1 ratio of Component A and Component B.
 - 9.3.6 The substrate shall be dry and free of frost, ice, rust, oil, grease, dirt, or any other substances that may prevent adhesion of the SPF to the substrate.
 - 9.3.7 HBS Approved ASW Spray Foam are intended for interior use only and are not to be used where they could come in contact with water. Provide protection from weather during and after installation.
 - 9.3.8 HBS Approved ASW Spray Foam shall be installed to the required thickness in accordance with the manufacturer installation instructions.
 - 9.3.9 Do not use HBS Approved ASW Spray Foam inside of electrical or junction boxes.

- 9.3.10 HBS Approved ASW Spray Foam shall be installed only when the temperature is at or above 14°F (-10°C).
- 9.3.11 Insulation shall not be installed in areas where the service temperature is greater than 180°F (82°C).
- 9.3.12 For general SPF installation guidelines, see the American Chemistry Council's Guidance on Best Practices for the Installation of Spray Polyurethane Foam.
- 9.4 Two-Hour Fire-Rated Non-Load Bearing ASW Assemblies
 - 9.4.1 Any two-hour fire-rated non-load bearing ASW assemblies shall be installed in accordance with the wall assembly designs listed in **Section 6.2**.
 - 9.4.2 Fire blocking shall be installed at the floor-to-wall intersections in accordance with the applicable code.
 - 9.4.3 Other fire resistant wall assemblies are outside the scope of this report.
- 9.5 Two-Hour Fire-Rated Load-Bearing WP Assemblies
 - 9.5.1 Any two-hour fire-rated load bearing WP assemblies shall be installed in accordance with the wall assembly designs listed in **Section 6.3**.
 - 9.5.2 Fire blocking shall be installed at the floor-to-wall intersections in accordance with the applicable code.
 - 9.5.3 Other fire resistant wall assemblies are outside the scope of this report.

10 Substantiating Data

- 10.1 Testing has been performed under the supervision of a professional engineer and/or under the requirements of ISO/IEC 17025 as follows:
 - 10.1.1 Fire testing of wall assemblies in accordance with ASTM E119
- 10.2 Engineering evaluation performed by Priest & Associates Consulting, LLC.
- 10.3 UL Fire Resistance Directory, Volume 1.
- 10.4 Information contained herein may include the result of testing and/or data analysis by sources that are approved agencies, approved sources and/or RDPs. Accuracy of external test data and resulting analysis is relied upon.
- 10.5 Where applicable, testing and/or engineering analysis are based upon provisions that have been codified into law through state or local adoption of regulations and standards. The developers of these regulations and standards are responsible for the reliability of published content. DrJ's engineering practice may use a regulation-adopted provision as the control. A regulation-endorsed control versus a simulation of the conditions of application to occur establishes a new material as being equivalent to the regulatory provision in terms of quality, strength, effectiveness, fire resistance, durability and safety.
- 10.6 The accuracy of the provisions provided herein may be reliant upon the published properties of raw materials, which are defined by the grade mark, grade stamp, mill certificate or <u>duly authenticated reports</u> from <u>approved agencies</u> and/or <u>approved sources</u> provided by the supplier. These are presumed to be minimum properties and relied upon to be accurate. The reliability of DrJ's engineering practice, as contained in this <u>duly authenticated report</u>, may be dependent upon published design properties by others.
- 10.7 Testing and engineering analysis: The strength, rigidity, and/or general performance of component parts and/or the integrated structure are determined by suitable tests that simulate the actual conditions of application that occur and/or by accepted engineering practice and experience.²⁶
- 10.8 Where additional condition of use and/or regulatory compliance information is required, please search for HBS Approved ASW Spray Foams on the DrJ Certification website.

11 Findings

- 11.1 As outlined in **Section 6**, HBS Approved ASW Spray Foam have performance characteristics that were tested and/or meet applicable regulations and are suitable for use pursuant to its specified purpose.
- 11.2 When used and installed in accordance with this <u>duly authenticated report</u> and the manufacturer installation instructions, HBS Approved ASW Spray Foam shall be approved for the following applications:
 - 11.2.1 As a component of the two-hour fire-rated non-load bearing ASW assemblies listed in **Section 6.2** (HBS Approved ASW Spray Foams only).
 - 11.2.2 As a component of two-hour fire-rated non-load bearing ASW assemblies without a protected wall when the ASW forms the fire barrier between attic spaces (HBS Approved ASW Spray Foams, only).
 - 11.2.3 As a component of the two-hour fire-rated load bearing WP assemblies listed in **Section 6.3** (HBS Approved WP Spray Foams, only).
- 11.3 Any application specific issues not addressed herein can be engineered by an RDP. Assistance with engineering is available from Huntsman Building Solutions.
- 11.4 IBC Section 104.11 (IRC Section R104.11 and IFC Section 104.10²⁷ are similar) in pertinent part states:

104.11 Alternative materials, design and methods of construction and equipment. The provisions of this code are not intended to prevent the installation of any material or to prohibit any design or method of construction not specifically prescribed by this code. Where the alternative material, design or method of construction is not approved, the building official shall respond in writing, stating the reasons the alternative was not approved.

- 11.5 **Approved**: ²⁸ Building regulations require that the <u>building official</u> shall accept <u>duly authenticated reports</u>. ²⁹
 - 11.5.1 An approved agency is "approved" when it is ANAB ISO/IEC 17065 accredited.
 - 11.5.2 An approved source is "approved" when an RDP is properly licensed to transact engineering commerce.
 - 11.5.3 Federal law, <u>Title 18 US Code Section 242</u>, requires that where the alternative product, material, service, design, assembly and/or method of construction is not approved, the building official shall respond in writing, stating the reasons why the alternative was not approved. Denial without written reason deprives a protected right to free and fair competition in the marketplace.
- 11.6 DrJ is a licensed engineering company, employs licensed <u>RDP</u>s and is an <u>ANAB-Accredited Product Certification Body Accreditation #1131</u>.
- 11.7 Through the <u>IAF Multilateral Agreements</u> (MLA), this <u>duly authenticated report</u> can be used to obtain product approval in any <u>jurisdiction</u> or <u>country</u> because all ANAB ISO/IEC 17065 <u>duly authenticated reports</u> are equivalent.³⁰

12 Conditions of Use

- 12.1 Material properties shall not fall outside the boundaries defined in **Section 6**.
- 12.2 As defined in **Section 6**, where material and/or engineering mechanics properties are created for load resisting design purposes, the resistance to the applied load shall not exceed the ability of the defined properties to resist those loads using the principles of accepted engineering practice.
- 12.3 Use of HBS Approved ASW Spray Foam in wall assemblies other than those listed in **Section 6** are outside the scope of this report.
- 12.4 HBS Approved Spray Foam may be used without an ignition barrier where permitted by ESR-3500 or Report Number 1406-03.

- 12.5 When required by adopted legislation and enforced by the <u>building official</u>, also known as the authority having jurisdiction (AHJ) in which the project is to be constructed:
 - 12.5.1 Any calculations incorporated into the construction documents shall conform to accepted engineering practice and, when prepared by an <u>approved source</u>, shall be approved when signed and sealed.
 - 12.5.2 This report and the installation instructions shall be submitted at the time of permit application.
 - 12.5.3 These innovative products have an internal quality control program and a third-party quality assurance program.
 - 12.5.4 At a minimum, these innovative products shall be installed per **Section 9** of this report.
 - 12.5.5 The review of this report by the AHJ shall comply with IBC Section 104 and IBC Section 105.4.
 - 12.5.6 These innovative products have an internal quality control program and a third party quality assurance program in accordance with <u>IBC Section 104.4</u>, <u>IBC Section 110.4</u>, <u>IBC Section 1703</u>, <u>IRC Section R104.4</u> and IRC Section R109.2.
 - 12.5.7 The application of these innovative products in the context of this report is dependent upon the accuracy of the construction documents, implementation of installation instructions, inspection as required by IBC Section 110.3, IRC Section R109.2 and any other regulatory requirements that may apply.
- 12.6 The approval of this report by the AHJ shall comply with <u>IBC Section 1707.1</u>, where legislation states in part, "the <u>building official</u> shall accept duly authenticated reports from <u>approved agencies</u> in respect to the quality and manner of <u>use</u> of new material or assemblies as provided for in <u>Section 104.11</u>," all of <u>IBC Section 104</u>, and <u>IBC Section 105.4</u>.
- 12.7 <u>Design loads</u> shall be determined in accordance with the regulations adopted by the <u>jurisdiction</u> in which the project is to be constructed and/or by the building designer (i.e., <u>owner</u> or <u>RDP</u>).
- 12.8 The actual design, suitability, and use of this report for any particular building, is the responsibility of the <u>owner</u> or the authorized agent of the owner.

13 Identification

- 13.1 The innovative products listed in **Section 1** are identified by a label on the board or packaging material bearing the manufacturer name, product name, this report number and other information to confirm code compliance.
- 13.2 Additional technical information can be found at www.huntsmanbuildingsolutions.com.

14 Review Schedule

- 14.1 This report is subject to periodic review and revision. For the latest version, visit dricertification.org.
- 14.2 For information on the status of this report, please contact DrJ Certification.

15 Approved for Use Pursuant to U.S. and International Legislation Defined in Appendix A

15.1 HBS Approved ASW Spray Foams and HBS Approved WP Spray Foams are included in this report published by an approved agency that is concerned with evaluation of products or services, maintains periodic inspection of the production of listed materials or periodic evaluation of services. This report states either that the material, product or service meets recognized standards or has been tested and found suitable for a specified purpose. This report meets the legislative intent and definition of being acceptable to the AHJ.

Appendix A

1 Legislation that Authorizes AHJ Approval

- 1.1 **Fair Competition**: <u>State legislatures</u> have adopted Federal regulations for the examination and approval of building code referenced and alternative products, materials, designs, services, assemblies and/or methods of construction that:
 - 1.1.1 Advance innovation
 - 1.1.2 Promote competition so all businesses have the opportunity to compete on price and quality in an open market on a level playing field unhampered by anticompetitive constraints
 - 1.1.3 Benefit consumers through lower prices, better quality, and greater choice
- 1.2 **Adopted Legislation**: The following local, state and federal regulations affirmatively authorize these innovative products to be approved by AHJs, delegates of building departments and/or delegates of an agency of the federal government:
 - 1.2.1 Interstate commerce is governed by the <u>Federal Department of Justice</u> to encourage the use of innovative products, materials, designs, services, assemblies, and/or methods of construction. The goal is to "protect economic freedom and opportunity by promoting free and fair competition in the marketplace."
 - 1.2.2 <u>Title 18 US Code Section 242</u> affirms and regulates the right of individuals and businesses to freely and fairly have new products, materials, designs, services, assemblies and/or methods of construction approved for use in commerce. Disapproval of alternatives shall be based upon non-conformance with respect to specific provisions of adopted legislation and shall be provided in writing <u>stating the reasons why</u> the alternative was not approved, with reference to the specific legislation violated.
 - 1.2.3 The <u>federal government</u> and each state have a <u>public records act</u>. In addition, each state also has legislation that mimics the federal <u>Defend Trade Secrets Act 2016</u> (DTSA),³¹ where providing test reports, engineering analysis and/or other related IP/TS is subject to <u>prison of not more than ten years</u>³² and/or a \$5,000,000 fine or 3 times the value of³³ the Intellectual Property (IP) and Trade Secrets (TS).
 - 1.2.3.1 Compliance with public records and trade secret legislation requires approval through the use of <u>Listings</u>, certified reports, <u>Technical Evaluation Reports</u>, <u>duly authenticated reports</u> and/or <u>research reports</u> prepared by <u>approved agencies</u> and/or <u>approved sources</u>.
 - 1.2.4 For <u>new materials</u>³⁴ that are not specifically provided for in any regulation, the <u>design strengths and</u> <u>permissible stresses</u> shall be established by <u>tests</u>, where <u>suitable load tests simulate the actual loads and</u> conditions of application that occur.
 - 1.2.5 The <u>design strengths and permissible stresses</u> of any structural material shall <u>conform</u> to the specifications and methods of design using accepted engineering practice.³⁵
 - 1.2.6 The commerce of <u>approved sources</u> (i.e., registered PEs) is regulated by <u>professional engineering</u> <u>legislation</u>. Professional engineering <u>commerce shall always be approved</u> by AHJs, except where there is evidence provided in writing, that specific legislation have been violated by an individual registered PE.
 - 1.2.7 The AHJ shall accept <u>duly authenticated reports</u> from <u>approved agencies</u> in respect to the quality and manner of use of new materials or assemblies as provided for in IBC Section 104.11.³⁶

- 1.3 Approved³⁷ by Los Angeles: The Los Angeles Municipal Code (LAMC) states in pertinent part that the provisions of LAMC are not intended to prevent the use of any material, device or method of construction not specifically prescribed by LAMC. The Department shall use Part III, Recognized Standards in addition to Part II, Uniform Building Code Standards of Division 35, Article 1, Chapter IX of the LAMC in evaluation of products for approval where such standard exists for the product or the material and may use other approved standards that apply. Whenever tests or certificates of any material or fabricated assembly are required by Chapter IX of the LAMC, such tests or certification shall be made by a testing agency approved by the Superintendent of Building to conduct such tests or provide such certifications. The testing agency shall publish the scope and limitation(s) of the listed material or fabricated assembly.³⁸ The Superintendent of Building Approved Testing Agency Roster is provided by the Los Angeles Department of Building and Safety (LADBS). The Center for Building Innovation (CBI) Certificate of Approval License is TA24945. Tests and certifications found in a DrJ Listing are LAMC approved. In addition, the Superintendent of Building shall accept duly authenticated reports from approved agencies in respect to the quality and manner of use of new materials or assemblies as provided for in the California Building Code (CBC) Section 1707.1.³⁹
- 1.4 Approved by Chicago: The Municipal Code of Chicago (MCC) states in pertinent part that an Approved Agency is a Nationally Recognized Testing Laboratory (NRTL) acting within its recognized scope and/or a certification body accredited by the American National Standards Institute (ANSI) acting within its accredited scope. Construction materials and test procedures shall conform to the applicable standards listed in the MCC. Sufficient technical data shall be submitted to the building official to substantiate the proposed use of any product, material, service, design, assembly and/or method of construction not specifically provided for in the MCC. This technical data shall consist of research reports from approved sources (i.e., MCC defined Approved Agencies).
- 1.5 **Approved by New York City**: The 2022 NYC Building Code (NYCBC) states in part that an <u>approved agency</u> shall be deemed⁴⁰ an approved testing agency via <u>ISO/IEC 17025 accreditation</u>, an approved inspection agency via <u>ISO/IEC 17020 accreditation</u>, and an approved product evaluation agency via <u>ISO/IEC 17065</u> <u>accreditation</u>. Accrediting agencies, other than federal agencies, must be members of an internationally recognized cooperation of laboratory and inspection accreditation bodies subject to a mutual recognition agreement⁴¹ (i.e., ANAB, International Accreditation Forum also known as IAF, etc.).
- 1.6 **Approved by Florida**: <u>Statewide approval</u> of products, methods or systems of construction shall be approved, without further evaluation by:
 - 1.6.1 A certification mark or listing of an approved certification agency,
 - 1.6.2 A test report from an approved testing laboratory,
 - 1.6.3 A product evaluation report based upon testing or comparative or rational analysis, or a combination thereof, from an approved product evaluation entity, or
 - 1.6.4 A product evaluation report based upon testing, comparative or rational analysis, or a combination thereof, developed, signed and sealed by a professional engineer or architect, licensed in Florida.
 - 1.6.5 For local product approval, products or systems of construction shall demonstrate compliance with the structural wind load requirements of the Florida Building Code (FBC) through one of the following methods:
 - 1.6.5.1 A certification mark, listing or label from a commission-approved certification agency indicating that the product complies with the code,
 - 1.6.5.2 A test report from a commission-approved testing laboratory indicating that the product tested complies with the code,
 - 1.6.5.3 A product-evaluation report based upon testing, comparative or rational analysis, or a combination thereof, from a commission-approved product evaluation entity which indicates that the product evaluated complies with the code,

- 1.6.5.4 A product-evaluation report or certification based upon testing or comparative or rational analysis, or a combination thereof, developed and signed and sealed by a Florida professional engineer or Florida registered architect, which indicates that the product complies with the code, or
- 1.6.5.5 A statewide product approval issued by the Florida Building Commission.
- 1.6.6 The <u>Florida Department of Business and Professional Regulation</u> (DBPR) website provides a listing of companies certified as a <u>Product Evaluation Agency</u> (i.e., EVLMiami 13692), a <u>Product Certification Agency</u> (i.e., CER10642), and as a <u>Florida Registered Engineer</u> (i.e., ANE13741).
- 1.7 **Approved by Miami-Dade County (i.e., Notice of Acceptance [NOA])**: A Florida statewide approval is an NOA. An NOA is a Florida local product approval. By Florida law, Miami-Dade County shall accept the statewide and local Florida Product Approval as provided for in Florida legislation 553.842 and 553.8425.
- 1.8 **Approved by New Jersey**: Pursuant to the 2018 Building Code of New Jersey in <u>IBC Section 1707.1</u>

 <u>General</u>, ⁴² it states: "In the absence of approved rules or other approved standards, the building official shall accept duly authenticated reports from <u>approved agencies</u> in respect to the quality and manner of use of new materials or assemblies as provided for in the administrative provisions of the Uniform Construction Code (<u>N.J.A.C. 5:23</u>)". ⁴³ Furthermore N.J.A.C 5:23-3.7 states: "Municipal approvals of alternative materials, equipment, or methods of construction."
 - 1.8.1 **Approvals**: Alternative materials, equipment or methods of construction shall be approved by the appropriate subcode official provided the proposed design is satisfactory and that the materials, equipment or methods of construction are suitable for the intended use and are at least the equivalent in quality, strength, effectiveness, fire resistance, durability and safety of those conforming with the requirements of the regulations.
 - 1.8.1.1 A field evaluation label and report or letter issued by a nationally recognized testing laboratory verifying that the specific material, equipment or method of construction meets the identified standards or has been tested and found to be suitable for the intended use, shall be accepted by the appropriate subcode official as meeting the requirements of the above.
 - 1.8.1.2 Reports of engineering findings issued by nationally recognized evaluation service programs such as but not limited to, the Building Officials and Code Administrators (BOCA), the International Conference of Building Officials (ICBO), the Southern Building Code Congress International (SBCCI), the International Code Council (ICC), and the National Evaluation Service, Inc., shall be accepted by the appropriate subcode official as meeting the requirements of the above.
 - 1.8.2 The New Jersey Department of Community Affairs has confirmed that technical evaluation reports, from any accredited entity listed by ANAB, meets the requirements of item the previous paragraph, given that the listed entities are no longer in existence and/or do not provide "reports of engineering findings."
- 1.9 Approved by the Code of Federal Regulations Manufactured Home Construction and Safety Standards: Pursuant to Title 24, Subtitle B, Chapter XX, Part 3282.14⁴⁴ and Part 3280,⁴⁵ the Department encourages innovation and the use of new technology in manufactured homes. The design and construction of a manufactured home shall conform to the provisions of Part 3282 and Part 3280 where key approval provisions in mandatory language follow:
 - 1.9.1 "All construction methods shall be in conformance with accepted engineering practices."
 - 1.9.2 "The strength and rigidity of the component parts and/or the integrated structure shall be determined by engineering analysis or by suitable load tests to simulate the actual loads and conditions of application that occur."
 - 1.9.3 "The design stresses of all materials shall conform to accepted engineering practice."

- 1.10 **Approval by US, Local and State Jurisdictions in General**: In all other local and state jurisdictions, the adopted building code legislation states in pertinent part that:
 - 1.10.1 For <u>new materials</u> that are not specifically provided for in this code, the <u>design strengths and permissible</u> stresses shall be established by tests.⁴⁶
 - 1.10.2 For innovative <u>alternatives</u> and/or methods of construction, the building official shall accept <u>duly</u> <u>authenticated reports</u> from <u>approved agencies</u> with respect to the quality and manner of use of <u>new</u> materials or assemblies.⁴⁷
 - 1.10.2.1 An <u>approved agency</u> is "approved" when it is <u>ANAB ISO/IEC 17065 accredited</u>. DrJ Engineering, LLC (DrJ) is in the ANAB directory.
 - 1.10.2.2 An <u>approved source</u> is "approved" when an <u>RDP</u> is properly licensed to transact engineering commerce. The regulatory authority governing approved sources is the <u>state legislature</u> via its professional engineering regulations.⁴⁸
 - 1.10.3 The <u>design strengths and permissible stresses</u> of any structural material...shall conform to the specifications and methods of design of accepted engineering practice performed by an <u>approved</u> source.⁴⁹
- 1.11 **Approval by International Jurisdictions**: The <u>USMCA</u> and <u>GATT</u> agreements provide for approval of innovative materials, designs, services, and/or methods of construction through the <u>Agreement on Technical Barriers to Trade</u> and the <u>IAF Multilateral Recognition Arrangement</u> (MLA), where these agreements:
 - 1.11.1 State that <u>conformity assessment procedures</u> (i.e., ISO/IEC 17020, 17025, 17065, etc.) are prepared, adopted, and applied so as to grant access for suppliers of like products originating in the territories of other Members under conditions no less favourable than those accorded to suppliers of like products of national origin or originating in any other country, in a comparable situation.
 - 1.11.2 **Approved**: The <u>purpose of the MLA</u> is to ensure mutual recognition of accredited certification and validation/verification statements between signatories to the MLA and subsequently, acceptance of accredited certification and validation/verification statements in many markets based on one accreditation for the timely approval of innovative materials, designs, services, and/or methods of construction.
 - 1.11.3 ANAB is an <u>IAF-MLA</u> signatory where recognition of certificates, validation, and verification statements issued by conformity assessment bodies accredited by all other signatories of the IAF MLA, with the appropriate scope, shall be approved.⁵⁰
 - 1.11.4 Therefore, all ANAB ISO/IEC 17065 duly authenticated reports are approval equivalent.⁵¹
- 1.12 Approval equity is a fundamental commercial and legal principle. 52

ANSI National Accreditation Board (ANAB) is the largest independent accreditation body in North America and provides services in more than 75 countries. DrJ is an ANAB accredited product certification body.
- 26 See Code of Federal Regulations (CFR) Title 24 Subtitle B Chapter XX Part 3280 for definition.
- 27
- Approved is an adjective that modifies the noun after it. For example, Approved Agency means that the Agency is accepted officially as being suitable in a particular situation. This example conforms to IBC/IRC/IFC Section 201.4 where the building code authorizes sentences to have an ordinarily accepted meaning such as the context implies.
